## SELECT OIL ABSORBENTS

SELECT OIL ABSORBENTS are the new range of absorbents from Waste Management Total Solutions. They have been developed to deal with the cleaning and recovery of oil based liquids on land or water.

The SELECT range of absorbents is ideal for oil based spillages, and everyday use when working with oils. Being hydrophobic they repel water and absorb oil, and even when fully saturated they will float indefinitely.

Select absorbents are capable of absorbing up to 25 times their own weight, and supply a cost effective solution to your safety concerns.

The SELECT range contains various different forms of absorbent, including Sheets, Rolls, Sweeps, Pillows and Booms. All absorbents also come in the Environment Agency preferred colour of blue.

### **OIL ABSORBENT SHEETS**

Select Sheets can be used to deal with smaller oil spills, and are ideal for where coverage is important.

### **OIL ABSORBENT ROLLS**

Select Rolls provide an alternative to the Select sheets.

## OIL ABSORBENT BOOMS

## OIL ABSORBENT PILLOWS

When you want to skim more than a little oil from the surface of retention pools, cooling baths, or sumps, use Select Jumbo Pillows. Each pillow absorbs up to 23 litres (5 Gallons).

**DIMENSIONS 71cm x 30cm x 12.5cm - Packed in bales of 10 Pillows**
